ONE TRIAL WILL PROVE THIS.

Columbia College Inaugurator Department of Boolology.

PRACTICAL SCIENCE.

Will Be in Charge of Prof. Pranklin II olddings a Young Man of Remarks able Ability and Learning-The Work Explained. The inauguration of a department

of sociology in the university faculty of political science at Columbia college is notable event, not merely as a marked development of university instruction in this country, but also as a utilization of the natural advantage this college possesses for the investi-gation of this and kindred subjects. It is obvious that the ability of colleges to give thorough training must largely vary with their surroundings. Medicine can only be well taught where there are great hospitals, music where it can be heard in all its varieties, and, most of all, sociology where humanity

This natural limitation, says Harper's Weekly, gives to this new department at Columbia advantages which Directory has recently been issued unmust make it at once the natural der the direction of the joint committee center for the study of this vast and vital subject. As the greatest center of American population. New York furnishes of necessity the most full and varied opportunity of social conditions. In this great city are sections tions. In this great city are sections so densely inhabited that the people living on one block would not have room for burial on the ground they live upon. Here is every range of our body-politic, from the so-called multi-millionaire to the lowest and vilest dregs of society, the widest range of the cabinet will meet Tuesdays and Fridays at eleven of clock.

"Monday will be reserved by the president." the solid vestibuled electric lighted nationality and trade. Here is a great natural laboratory of medern social

conditions waiting investigation.

President Low, of Columbia, for many years has been president of the University settlement, which has done such admirable work in the tenement districts of New York, and has, as well taken a leading part in nearly every public movement of a philanthropic or mane character in recent years. Indeed, the institution of this department has long been his personal wish, and it is largely to this interest that it has been inaugurated.

Three years ago a special course of lectures on this subject was begun by Prof. Franklin H. Giddings, who has street, Chicago, Ill., for one of them and a new map of the United States urnished free.

Home and Abroad.

Prof. Franklin II. condings, was has fust been appointed to fill the newly created stair of sociology in this department. Prof. Giddings was born in Sherman, Conn., March 28, 1885; he was graduated with an A. B. from It is the duty of everyone, whether for ten years on newspapers, among

hem being the Springfield Republic-

an, securing the broad and varied training that comes with newspaper work. While so engaged he also made for the Massachusetts bureau of labor statistics a special investigation of profit-sharing, which was the beginning of a general interest in that subject in this country. In 1888 he was called to the chair of political economy called to the charrof political economy at Brya-Mawr, teing made a full professor there in 1892. His study of sociology had begun in 1872. In an official capacity in the American Academy of Political and Social Science he has written much, and the American Ecoperation of the sense of the se

lying causes. It is planned also to the was born at Portland, October 18, otilize this laboratory work for the tabulation and preservation of the year of his age. He was first elected large amount of statistical informa-tion gathered by the charitable socio-ties, which is now so largely wasted, so as to make it a bureau of sociolog-ical information for this country. It is interesting to know that under the Mr. Reed is contained in ten lines of

CAST-IRON BRICKS.

Walls of Some German Institutions Constructed of That Material. "While I was in Germany last year." said W. L. Burgess of New Haven, "I came across several walls surrounding some of the public instiutions that were constructed out of cast-iron bricks. These bricks certainly have many advantages over the old fashioned clay bricks, though of their committees, there are published they may not prove to be superior in all respects. In form and size these bricks resemble our ordinary bricks, but they are composed of cast-iron and hollow. The shell is so thin that the brick weighs less than one made of clay. A wall is built of such matar, and no skilled labor is required in laying them. The upper This bit of Information is exceedingly and lower sides of the bricks are provided with grooves and projecting ribs, which fit into each other easily and perfectly, and form a wall of great strength. There are also two side of each brick, arranged so as to One of the projections is hookhaped, which secures a solid hold. A wall of these bricks is put together is covered with paint. This closes all the cracks rendering the wall air tight, and prevents the bricks from rusting. The bricksare very durable, and a building constructed of them would be practically fireproof."

Highest of all in heavening Power .-- Latest U. S. Gov't Report.
